

Neopost Hasler Scales Offer Electronic Postal Weighing Efficiencies To Fit Any Need

Scales and Weighing Platforms

Scale capacities include 5 lbs. and 10 lbs. for light volume, 20 lbs. and 30 lbs. for medium volume mail and shipping, and 70 lbs. for heavy processing.

Neopost Hasler's diverse line of scales and weighing platforms ensure the correct postage is always applied no matter the size or weight of your mailing. They instantly compute and display the exact postage rates and special services, if required, for all mail and parcels.

And with the optional "Differential Weighing" feature, you get one of the fastest methods for instant processing of individual pieces of mixed size, weight and class of mail - up to five times faster than conventional methods.
